

Rain gardens for Municipalities

20 October 2023 1:00 pm – 3:00 pm
Bensalem Public Works Building,
2400 Byberry Road.
[Google maps address.](#)

As a Green Stormwater Infrastructure (GSI) practice, raingardens are workhorses. Outstanding stormwater treatment and a valuable educational tool, they are an attractive landscape feature and can build community support for stormwater management.

Join us, to learn and discuss the where, how, who, and hereafter of raingarden installation and maintenance. The workshop location will offer an in-progress raingarden installation that reflects collaboration among local organizations.

Refreshments provided.
Please register [HERE](#).

Financial and other support for this project is provided by the Pennsylvania Association of Conservation Districts, Inc. through a grant from the Department of Environmental Protection under Section 319 of the Clean Water Act, administered by the U.S. Environmental Protection Agency.
